**II.1.4) Short description:**

The ESM requires a Business intelligence ("BI") tool (software) that will provide filtering, aggregation and visualisation of the information stored in a database on the ESM website. The ESM may also use the BI tool for other purposes than reporting on economic data, for instance for Human Resources, Investment or risk reporting which would not necessarily be published on the ESM website, but in those cases the reports would be shared within the specific division or across the institution. The proposed BI tool must be commercially available, off-the-shelf product, which can be deployed on the existing ESM's ICT infrastructure. The ESM will also require development services for some dashboards following the completion of the 'proof of concept' and other development services on an ad-hoc basis from time to time during the Contract term.
